APPROVAL OF STATE ENGINEER
is issued subject to the terms and conditions imposed in said Permit 31054 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a measuring device must be installed in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.  The total combined duty of water under this permit and Permit 46756 shall not exceed 80.0 acre-feet.  The total combined amount of water granted under this permit and Permit 46756 is limited to what the well covered under the two permits is capable of producing. If certificates of appropriation are issued under this permit and Permit 46756, the total combined amount of appropriation granted in said certificates shall not exceed what the well covered under the two permits is capable of producing.
The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not
to exceed 0.1875cubic fect per second, but not to exceed a yearly
duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.
Work must be prosecuted with reasonable diligence and be completed on or before March 18, 1984
Proof of completion of work shall be filed before. April 18, 1984
Application of water to beneficial use shall be made on or before March 18. 1986
Proof of the application of water to beneficial use shall be filed on or before
Map in support of proof of beneficial use shall be filed on or before
Completion of work filed
Proof of beneficial use filed
Cultural map filed
